

FPPC Commission Chair
Karen Getman and
FPPC Commissioners

This letter is in reference to the FPPC Conflict of Interest involving Terilyn Hanko, one of the directors of the Peninsula Hospital District Board.

As an RN at Mills-Peninsula/Sutter, and as a resident in the Peninsula Hospital District, I know that Terilyn Hanko has been the *ONLY* member of the Board that voices the interests of the people. She continuously demands accountability of Mills-Peninsula/Sutter. Now especially, since Mills-Peninsula/Sutter want the District's blessings to build a new hospital on 20 (out of 26), acres of District land. The District approval will obligate the community to a 50 year lease for \$1.00/yr with no District oversight. The people's voice has been amputated by the FPPC conflict ruling.

If you read any newspaper articles in which Terilyn has been quoted, you can see that she makes no bones about being on the side of the public, taking Sutter to task about the unfair way they have treated, and continue to treat, the public, and the people's assets.

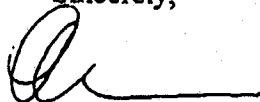

The FPPC conflict ruling would only serve to benefit the goals of the Sutter Corporation, leaving the public, once again, to pay the bill without having eaten the meal.

Terilyn has integrity and honesty, and has proven to me and many of the RNs I work with to be the person to carry the real truth to the voters that support the hospital.

If you feel you want more input before making your final decisions, please feel free to contact me at any time.

Thank you for your consideration.

Sincerely,

Luciana Kincer, RN
